Allowable Subject Matter

3. Claims 1-31 are allowed.
4. The following is an examiner's statement of reasons for allowance: The closest prior art is (US 2002/0028426) Pasant. Pasant teaches a method and system for electronic post-secondary education planning over the Internet that provides for college, university, adult education and trade school information so that users can go through the process of finding appropriate post-secondary education and tips on financial aid, but fails to teach a system and method for allowing each school to, on its own, setup and customize financial-aid information web pages to be presented to students connecting to a school-access graphical user interface in independent claims 1 and 18.

The dependent claims 2-17 and 19-31 being further limiting to the independent claims, definite and fully enabled by the Specification are also allowable.

It appears that the instant invention is beyond the skill of one of ordinary skill in the art. Accordingly the invention would NOT have been obvious because one of ordinary skill could not have been expected to achieve it, NOR would they have been able to predict the results, and as such, they would have had no capability of expecting success.
